

Hematology-Oncology/Abramson Family Cancer Research Institute Seminar Series University of Pennsylvania Perelman School of Medicine

Fall 2016

Image courtesy of Ravi Maddipati (Stanger Lab): tumor cells imaged with unique lineage tracing (termed "Confetti")

September

09-06-16 Bruno Paiva, PhD

Research Fellow, Hematology and Immunology, University of Navarra, Pamplona, Spain
Multiple myeloma: A phenotypic perspective from bench to bedside

09-20-16 Andre Nussenzweig, PhD

NIH Distinguished Investigator, Branch Chief, Laboratory of Genome Integrity, NIH Center for Cancer Research
Mapping genome instability

October

10-04-16 Kris Wood, PhD

Assistant Professor, Department of Pharmacology and Cancer Biology, Duke University
Systems-level approaches to study and manipulate anticancer drug resistance

10-18-16 Junwei Shi, PhD

Assistant Professor of Cancer Biology,
University of Pennsylvania
Seminar title to be announced

November

11-01-16 Anindya Dutta, MD, PhD

Harry F. Byrd Professor and Chair of Biochemistry and Molecular Genetics, University of Virginia
Nucleic Acid Tales: MicroDNAs, tRFs, and LncRNAs

11-15-16 Joseph Marcotrigiano, PhD

Associate Professor, Department of Chemistry and Chemical Biology, Rutgers University
Seminar title to be announced

December

12-06-16 Alan J. Warren, PhD

Professor of Haematology, University of Cambridge, UK
Licensing newly formed ribosomes to enter translation
