

Thanks to three second-year medical students, the Perelman School now offers a fresh way for students to work alongside -- and learn from -- nationally renowned faculty innovators. . . . they will each apply their new knowledge in a focused experience -- such as an internship or research project -- aimed at improving healthcare delivery. Overall, H-MET (Health Care Management, Entrepreneurship, and Technology) seeks to bring the first-hand study of technology, population management, and broad health industry organization into the education of physicians who want to be leaders in academic medicine or other clinical settings. . . . Today, along with Dr. Asch, Dr. Shivan Mehta, the Director of Operations for the Penn Medicine Center for Health Care Innovation, and Dr. Nalaka S. Gooneratne, Course Director for the Biomedical Entrepreneurship Frontiers, serve as H-MET faculty advisors.
