The following information will help you prepare for your kidney transplant evaluation appointment at Penn Medicine at Bucks County, 777 Township Line Rd., Suite 200, Yardley, PA. (Please note GPS does not work for this address.) Directions are attached. Your visit will last anywhere from 2 to 3 hours. We kindly ask you to arrive promptly. You will find several pages following with important information, and we encourage you to read it and contact us if you have any questions at the number below.

The evaluation day is designed to provide both a medical evaluation and an opportunity to learn about transplantation as a treatment option. You will meet members of the transplant team. At some point after this initial appointment, you may be asked to visit us at our outpatient facility in Philadelphia to complete other tests or additional consultations prior to being listed for a transplant.

We strongly urge you to bring someone with you, like a family member, significant other or friend. We share a lot of information with you on evaluation day and our patients find it very helpful to have another person with them.

Please bring the following items with you:

- Photo ID and verification of insurance
- All referrals or pre-authorizations required by your insurance carrier
- Current medication list
- Lunch or snack
- Any medications you may need to take during the hours of your scheduled visit

If you are unable to keep your appointment, please contact us at 215.662.6200. We look forward to meeting you.

Sincerely,

The Penn Kidney Transplant Team
The living donor option and paired exchange options in kidney transplantation

The benefits of a living donor kidney are important for all patients seeking a kidney transplant to understand. These benefits include:

» Kidneys from living donors generally last longer than those from deceased donors, leading to the best outcomes.
» Normal waiting time for a kidney is reduced.
» Time on dialysis is limited, or even avoided.
» Surgery can be scheduled at a convenient time for donor and recipient.

We invite you to bring up to three potential donors to your evaluation appointment and they can participate in an education session. We also have included a living donor referral form that can be faxed to us at 215.615.3814 or sent in the envelope provided.

We have included a fact sheet on paired kidney exchange, another alternative in living donation.

Insurance

Call your insurance company directly to see if you require a referral from your primary physician before you see us. If you do, you must have that referral at the time of your visit. Otherwise, you will be personally responsible for the bills.

If we can help answer any questions, contact the transplant financial coordinator at 215.662.7329.

Medical records and tests required to complete a kidney transplant evaluation

We want to understand your current medical condition so we need medical records and tests so we can get a better picture.

Some of these records and tests have been completed by your local doctors already, so it would be helpful to have copies before you visit us. If we can’t obtain them, please keep your appointment anyway and we will gather them later.
Here is a list of the kinds of items we will need:

» History and physical from your nephrologist and/or primary care provider
» Recent blood test (if done in the last 3 months)
» Reports from any other specialists you see (like cardiologyists or oncologists)
» Your blood type, called ABO
» Chest X-ray (if done within the last year)
» Other blood tests including: Hepatitis B & C profiles, HIV and RPR testing if available
» If on dialysis, nutritional and social work assessments
» If you have an advanced directive, bring a copy
» Any other testing (like X-rays, ultrasounds or cardiac studies) that your physician feels is important for us to have.

Some other tests we will request:

» For males over the age of 50:
  Prostate Specific Antigen (PSA)

» For females:
  Pap smear
  Mammogram (over the age of 40)

» All candidates over age 50, on dialysis longer than 2 years or who have diabetes:
  Nuclear stress test

» All candidates over age 50:
  Screening colonoscopy
As you will learn during your kidney transplant evaluation, blood type is something very important for us to record accurately.

The organization that regulates transplant for the federal government asks for two different ABO tests before anyone can be listed for a kidney transplant.

We will do one of these ABO tests on the day of your evaluation. But since we need two of these, you can have your local doctor do the ABO test and bring us the results when you visit us. Or, you can have an ABO test after your evaluation. If you have it done after, you will have to have the ABO test and the results faxed to us quickly so there won't be any delay in listing you for a transplant.

Again, if you have any questions after you have read the enclosed pages, please call us at 215.662.6200.
Directions to Penn Medicine Bucks County do not appear on GPS.

### From Philadelphia via I-95 North
Take I-95 North to Newtown Yardley Exit (Route 332). At end of ramp, make a left onto Route 332 (Newtown Bypass). Make a left onto Stony Hill Rd. Continue straight onto Township Line Road (Stony Hill curves off to the left). 777 Township Line Rd. is the large office building on the right immediately adjacent to the farm.
